# GO GREEN !

As a major global manufacturer of bathing products, we at Jaquar are well aware of our responsibilities. Conservation of precious water as a natural resource has long been the primary goal of our sustainability efforts to help preserve the living planet for our future generations. Go Green is a philosophy embraced by Jaquar as a tenet of its design and production system to save water.

## Technology that **saves** water

### Flow Restrictors

This is a revolutionary technology that lets your taps and showers save upto 80% of water without compromising on the flow.

Jaquar Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

Flow Restrictor

Flow rate options available:  
1.4, 2.5, 4.0, 6.0,  
8.0, 13 LPM

Flow rate options available:  
6.0, 8.0 & 12 LPM

Flow Restrictor

### Air Showers

Jaquar's Air Showers have a built-in air mixer that mixes air and water in a manner that makes shower drops lighter but voluminous. This revolutionary technology helps Jaquar air showers save up to 30% of water without compromising on the showering experience. Choose from a wide range of Hand and Overhead Jaquar Air showers with single and multi-flow options.

70% Water + 30% Air  
= 100% Rejuvenation

### Pressmatic Faucets

Taps with technology that allows only a fixed quantity 1.5 ltrs. of water to flow with every press of its knob. This mechanism not only prevents water wastage during each use, but also provides ease of operation. Jaquar Pressmatic taps are recommended for bathrooms of high traffic locations like restaurants, clubs, hotels, colleges, hospitals, airports etc.

## Sensor Faucets

Faucets with technology that allows water to flow only when you need it and shuts it as soon as you move your hands away, resulting in zero wastage of water. There's no better way to save water than when you don't need it e.g., while washing hands with soap, you can save water when lathering. Use Jaquar Sensor taps in high traffic areas like restaurants, clubs, hotels, colleges, hospitals, airports etc.

### Three stages of washing hands

Wetting your hands

Making lather with soap

Rinsing your hands

### Water consumption chart

## Dual Flush

Flushes that use more water than needed are the biggest water wastage culprits in every home. Jaquar's dual flushing systems enable you to use either a combination of 3/6 ltrs of water or 2/4 ltrs of water, depending on your water closet. Jaquar's beta valve is designed to save 50-60% of water every day.

## Features

### Advanced Rubit Technology

A feature that keeps showers clean and increases their longevity. Since the spray jets on the showers are made from elastic silicone, they ensure that no limescale deposits stick to the shower face. Even if they do, they can be easily rubbed off by hand or flannel.

### Click Position System

All Jaquar multi-function showers feature the convenient click mechanism. You can feel and hear the click while changing the function of the shower sprays.

### Thermo Insulation

Jaquar's insulated shower systems prevent scalding by not heating up the shower body.

### Jaquar Booster Technology

Jaquar Booster Technology creates the sensation of a full shower regardless of the water pressure.
